

INTRODUCTION

Headquartered in Lancaster, PA, ITT Industries Engineered Valves' product line is as extensive as the many industries that we serve. Our 45 year heritage stems from diaphragm valves, of which we are the recognized leader.

Through the years, our product offering has grown extensively. Our corrosion handling expertise has provided the impetus for the design of quarter-turn valve products like our Cam-Tite® Ball Valve.

By developing products such as the Cam-Tite that address specific problems encountered in industry, we continue to expand our commitment to remain a leader in flow control.

The performance of our products is surpassed only by the care taken in the many facets of their manufacturing. Excellence in quality assurance, product reliability, and product safety will always remain of paramount concerns.
