Warning

ITT Industries Valves and Valve Actuators are designed and manufactured using good workmanship and materials, and they meet all applicable industry standards. These valves are available with components of various materials, and they should be used only in services recommended in this product catalog or by a company valve engineer.

ITT Industries is anxious to avoid injuries and property damage which could result from a misapplication of the product. A selection of a valve of the proper material consistent with the particular performance requirement, is important for safe use.

Examples of the misapplication or misuse of a CAM-TITE® Valve include use in an application in which the pressure/temperature rating is exceeded and failure to maintain valves as recommended. If a valve appears to be leaking, do not operate. Remove valve from service, repair, or replace.
