

Fabri-Valve C45 Ductile Iron Knife Gate Valve

ITT

ENGINEERED FOR LIFE

C45 Ductile Iron Knife Gate Valve

Optional DP polyurethane replaceable seat

Replaceable seat is held in place by the adjacent mating flange.
Shown with energized cored packing.
Standard with 6" (DN 150) and larger Figure C45 valves.

The basic Fabri-Valve C45 features a solid ductile iron or carbon steel body with an integral cast metal seat. However, this valve is most often used with the patented, pop-in style replaceable seats, which are available in a variety of rubbers, polyurethane, UHMW-P, TFE, and hard-faced metal. The pop-in seats feature a much larger cross section and seating area than conventional knife gate valve seats thus providing a seating surface far removed from the flow stream. Replaceable seats offer a unique advantage; abrasion resistance, long seat life, and the convenience of easy seat replacement.

All C45 knife gate valves with handwheels include a provision for a locking device.

Caution: (Replaceable soft seats)

Review Fabri-Valve gasket/mating flange recommendations.

Specifications

Size Range

2" – 24"

Pressure Rating

150 psi (10.3 bar) CWP (cold working pressure)

Temperature Rating

Maximum temperature 250°F (121°C).

See Materials of Construction (seat section).

Service temperatures above 400°F (204°C) require high temperature fasteners. Specify service temperature on paperwork.

Flange Drilling

Flat faced ANSI 125/150

Testing

Every Fabri-Valve C45 valve is fully tested prior to shipment. Testing includes a body shell test, a seat test, and a cycling test to insure proper functioning of moving parts. Additional testing is also available. Please let us know your requirements.

Standard Shell test:

- Hydro test at 1.5 times the rated CWP (cold working pressure) – Zero allowable leakage

Standard Seat test:

- Metal Seat: Hydro test at 40 psi (2.8 bar) and at the rated CWP
- Resilient Seat: Hydro test at 15 psi (1 bar) and rated CWP

Pressure/Temperature Ratings

The table below is the Maximum Pressure/Temperature Ratings for the metallic components only. When checking pressure/temperature ratings, check the temperature rating and chemical compatibility of the packing material and, if applicable, the resilient seat material. In a majority of knife gate valve designs, the temperature limit or the chemical compatibility of the seat and/or packing material determines the practical pressure/temperature limitations.

Figure C45			
Pressure/Temperature Rating - psi			
Temp		Cast Steel WCB A-216	Cast DI A536 GR 65-45-12
°F	°C		
150	66	150	150
200	93	150	150
250	121	150	147
300	149	150	143
350	177	150	139
400	204	150	135
450	232	150	131
500	260	150	127
600	316	150	119
700	371	142	
800	427	103	
900	482	57	
1000	538	21	

Low Pressure Operation

Metal seated knife gate valves are seat tested at 40 psid (2.8 bar) in the preferred flow direction. When pressure falls below the 40 psid (2.8 bar) test pressure, less force is pushing the gate into the seat, which may result in additional seat leakage. When improved low-pressure shutoff performance is required, optional chest buttons should be specified.

Available Options

- "D" Ring Seat
- Lever Operator
- Dual Seats
- Poly Replaceable Seats
- UHMW Replaceable Seats
- PTFE Replaceable Seats
- Rubber Replaceable Seats
- Hard Faced Gate Edge
- Hard Gate Material
- Nickel-TFE Coated Gate
- Epoxy Coating
- Thru Drilled Flanges
- Flush Ports
- Chest Buttons:
Not available 2" – 6"
- Cast Ni-Hard Deflection
Cones: Available sizes
3" – 16"
- Fabricated Deflection Cones
- Locking Devices
- E-Z Spin Handwheel
- Live Loaded Packing
- Self-Supporting Yokes
- Bevel Gear
- Chainwheels
- Cylinder Actuators
- Electric Actuators
- Ratchet
- Extended Stems
- Rod Boots

Shutoff Performance

Metal Seat

- Single integral metal seat
2" – 24" 40cc / minute / inch of valve size
- Single hardfaced replaceable metal seat
2" – 24" 80cc / minute / inch of valve size
- Dual hardfaced replaceable metal seats
Consult factory. All sizes.

Resilient Seat

- Single "D"ring, or single replaceable resilient seat (excluding PTFE)
Zero leakage. All sizes.
- Dual seats
Consult factory. All sizes.
- Single replaceable PTFE seat
Consult factory. All sizes.

Flow Coefficients

The Cv values below represent U.S. gallons per minute 60°F water through a 100% open valve at a pressure drop of 1 psi. The metric equivalent, Kv, is the flow of water at 16°C through the valve in cubic meters per hour at a pressure drop of 1 kg/cm². To convert Cv to Kv, multiply the Cv by 0.8569.
