

F39 Slide Gate Valve

ITT

ENGINEERED FOR LIFE

F39 Slide Gate Valve

The Fabri-Valve Figure F39 slide gate valve is designed for shut off and throttling in difficult abrasive and/or high solids slurry service. The standard round port configuration is used for on/off service and the optional diamond port configuration is used for throttling. Available with a handwheel or automated, the Figure F39 has the unique ability to operate in a static column of solid particles and powders. The opening in the slide gate merely moves a disc of material laterally then returns it when the slide gate is reversed. Consult factory for shut off capability with standard and optional seats.

All Figure 39 slide gate valves with handwheels include a provision for a locking device. Consult factory for details.

Specifications

Size Range	1.5" – 96"
Pressure Rating	
1.5" – 24":	150 (10.3 bar) CWP (cold working pressure)
25" – 48" :	Available in 50 (3.5 bar), 100 (6.9 bar) and 150 (10.3) CWP
Above 48":	Manufactured to customer specification
	Consult factory for higher pressure designs.
Temperature Rating	
1.5" – 48":	500°F (260°C)
	Service temperatures above 400°F (204°C) require high temperature fasteners. Specify service temperature on paperwork. Consult factory for sizes larger than 48" (DN1200) and for service temperatures up to 2000°F(1093°C).
Flange Drilling	ANSI 125/150

Remote operated F39 valves are equipped with a bottom protection shroud as standard.

Testing

Every Fabri-Valve Figure F39 valve is tested prior to shipment. Testing includes a body shell test and a cycling test to insure proper functioning of moving parts. Valves with a resilient seat are also seat tested. Additional testing is also available. Please let us know your requirements.

Shell test: Hydro test at 1.5 times the rated CWP — zero allowable leakage

Seat test: Resilient seat — Hydro test at 15 psi (1 bar) and rated CWP — allowable leakage as follows:

Single "D" ring, or single replaceable resilient seat (excluding PTFE)

All sizes zero leakage

Single replaceable PTFE seat

All sizes consult factory

Dual seats – all configurations

All sizes consult factory

Materials of Construction

Part	Materials	
	F39R	F39S
Wetted Body and Chest Components	Stainless steel type 304, 316 or 317L	Stainless steel type 304, 316 or 317L
External Flanges and Stiffeners	Carbon steel flanges	Same as wetted components
Seat	Same as wetted components	Same as wetted components
Gate	Same material as body finished to 63 RMS	Same material as body finished to 63 RMS
Yoke	Carbon steel	304 stainless steel
Yoke Bolting	Plated steel	Stainless steel
Packing	Acrylic/PTFE/silicone	Acrylic/PTFE/silicone
Packing Follower	Ductile iron/Carbon steel	Stainless steel
Follower Bolting	Plated steel	Stainless steel
Stem	304 stainless steel	304 stainless steel
Stem Nut	Acid resistant bronze	Acid resistant bronze
Lubrication Fitting	Plated steel	Plated steel
Handwheel	Cast iron	Cast iron
Handwheel Retaining Nut	Malleable iron	Stainless steel
Tab Washer	Stainless steel	Stainless steel
Travel Stop	Plated steel	Stainless steel

* Valve with Handwheel

Flow Coefficients

The Cv values below represent U.S. gallons per minute 60°F water through a 100% open valve at a pressure drop of 1 psi. The metric equivalent, Kv, is the flow of water at +16°C through the valve in cubic meters per hour at a pressure drop of 1 kg/cm². To convert Cv to Kv, multiply the Cv by 0.8569.

1500*	816*	11		10				

* "R" Series valves have alloy steel wetted parts and a carbon steel exterior. Standard "R" Series valves are limited to 700°F (371°C); however alternate "R" Series constructions are available to 1000°F (538°C)

NOTE: Each valve is identified by Size-Figure-Series-etc. The "How To Order" section explains the Valve Model Codes.
